

# Recyclables

*Becoming Environmentally Friendly*

## *Fabrinox Thinking Green with Waste Containers*

Fabrinox innovative team can offer waste containers to suite your specific recycling solutions.

With our design and manufacturing skills, Fabrinox uses a customised approach to ensure that the end products will suite customer requirements and add to their corporate image.

Waste Containers can be design for either kerb side collection, roll-on roll-off or bulk collection. To minimize removal cost waste containers is designed to accommodate current waste bins or plastic bin liners.

Our innovative design allow for Wet & Dry recycling in single waste container.

For easy cleaning, in-store waste bins can be fitted with lockable castor wheels, to ensure that all cleaning is completed out of public sight.

The development process of the units is complete CAD based and designs are reviewed and finalised in digital format even before any prototyping started. This serves as an excellent example of technology making product development faster and more cost effective.

Fabrinox offers an unique service in under-licence manufacturing, turnkey projects, standard products and component manufacturing with cutting edge technology.
